Bring the ocean to your own home! You even have the choice between Nordic Sea, Mediterranean and Atlantic.

You wanted more? Well, then close your eyes and move the Ocean Drum with lots of feeling, remember your last holidays at the seashore and you'll get very close to reality. Quite stormy, isn't it?

Of course the larger drums sound the wildest but the smaller ones offer something too—they are easiest to handle and perfect for kids. Those who like colours may choose an Ocean Drum with an underwater design. As one side of the skin is transparent it is nice to watch the little balls moving like waves. Ocean breakers and waves become one. Eyes, ears and hands are equally in demand—wonderful relaxing and meditative. It is a fascinating special-effect instrument that is popular not only for music therapy but also for musicians and in work with children. By the way, you can use the Ocean Drum as a normal frame drum, too—a striker is included.
