

Sen-Plates

PESP105 blue

PESP205 silver/grey

The inherent sound of metal can be expressed perfectly with the special tuning technique of Sen-Plates. Each tone can sound soft or powerful according to the intensity and the way the plate is struck. A special timbre is created by the corresponding pairs of sound fields creating a subtle vibration of overtones. The Sen-Plates are available as "six-flat" in two pentatonic tunings, enabling players to improvise freely and play interactively.
