Shaman Rattles

A shaker or rattle is a simple but flexible and quite powerful tool that can be played with or without a drum. During healing ceremonies it helps to release blocked energy. The shaker moves, transforms and gets things going. Its sound can be varied easily, providing different results. According to its cultural surrounding the shaker offers a different form and use. It is an inseparable part of man and his rites. Some are decorated with feathers and pearls as we see with the Native Americans, others are skillfully carved from natural materials. The shaker always is an expression of man's creativity.
