

Sound Shapes

PESS100

PESS200

Sound Shapes are groups of thin drumming disks of different shapes and colours. They make a lightweight low budget ensemble with a great variety of styles. The shackle holds the six Sound Shapes of different sizes together. The whole thing is installed on a simple cymbal stand. If played with drum sticks or felt strikers the drum set offers a sound spectrum from a Piccolo to a Bass Drum. Easy to install and to carry.
