**SIHA027**  
20 String

The Harp is one of the oldest musical instruments known to mankind. For ages the sound of the Harp has been considered to be the magic of divine and supernatural powers. In ancient legends we read how gods and goddesses rule the world with the help of sound: the Finn god Wäinämöinen guides and charms the whole creation, David goes with the Harp to Saul who is tortured by an evil ghost. Still in the 19th century art lovers firmly believed that the sound waves of the Harp conquered evil and saved humanity from worries and anxieties.

We offer hand made types from a German instrument maker: simply constructed low budget harps of Celtic type with a good sound. Suitable for beginners. There are hooks for F# and Bb, more on request.

Lap Harp: 20 nylon strings, 80 cm high, foot stand on request. Other types with 24 or 27 nylon strings are also available.
