

# Melodica

PEME100

The Melodica presents itself as an easy-to-play instrument for kids and for adult beginners. The keyboard is similar to that of a piano and offers a scale of two or three octaves. However, the sound comes out only if you blow simultaneously into the mouthpiece. The Melodica is a combination of a key and wind instrument. The mouthpiece can be fixed onto a tube, hence the instrument can be placed on a table while playing.

It is an interesting fact that the Melodica nowadays is used for Balkan and Klezmer music—the sound fits perfectly. It is also easy to learn and to carry. A bag for the melodica is included.

We offer a low budget instrument made by Walther and a model of higher quality made by Hohner.
