

Pandeiro

TMPA100

This very popular typical Brazilian Bell Drum is mostly heard in Samba and Capoeira, the fighting game of Brazil. Its origin is in the Arabian area though. In a solid frame made of plastic or wood there are a couple of flat metal plates fixed in pairs, whose size and quality fundamentally influence the sound. The tightly stretched skin is either animal or plastic skin. The experienced musician produces the typical tips and slaps with the help of the thumb and the ball of the hand
