

Traverse Flute

BLTF100
Black plastics, alpaca key

This Traverse Flute is specially made for playing Baroque music. It has the so called “just tuning” where each key has its own exact intervals. Thus a G sharp for instance differs from an A flat and has to be played differently. Those exact and pure pitches give the music from the Baroque period a remarkably beautiful sound. The scale ranges from D \flat to A \natural , the A is tuned to 440Hz. The length of the threepart flute is around 59cm.

Incl. Bag, fingering chart, wipe cloth
